

Brilliant Polymers Wins Two Prestigious Awards at IFCA Star Awards 2025

Brilliant Polymers, a leading manufacturer of high-performance laminating adhesives for flexible packaging, proudly announced its double win at the IFCA Star Awards 2025, organized by the Indian Flexible Packaging & Folding Carton Manufacturers Association (IFCA). The company's H514 / A505 and HA9754 / A900 adhesive systems were recognized for their exceptional performance and innovation in solvent-based laminating adhesive solutions.

As a Gold Sponsor of the IFCA Star Awards 2025, Brilliant Polymers continued its longstanding association with the event, reinforcing its commitment to advancing the flexible packaging industry through technology, quality, and service. The awards ceremony, held on 9th October 2025 at the Mumbai Cricket Association, BKC, brought together industry leaders, innovators, and partners to celebrate excellence in packaging innovation and performance.

Brilliant Polymers had nominated a range of both solvent-based and solvent-free adhesives for consideration at this year's awards. The recognition of H514/A505 and HA9754/A900 underscores the company's dedication to developing products that meet the ever-evolving performance, efficiency, and sustainability demands of the packaging industry.

The **H514 / A505** system stood out for its superior bond strength, process versatility, and reliable performance across a wide range of substrates. Designed to deliver consistent results in demanding applications, this adhesive combination exemplifies Brilliant's commitment to creating dependable, high-performance solutions for converters.

Meanwhile, the **HA9754 / A900** system was recognized for its outstanding performance in high-speed lamination and its compatibility with a variety of inks and films. With its excellent wettability, high heat resistance, and consistent curing profile, HA9754 / A900 represents the next generation of solvent-based laminating adhesives engineered for efficiency and productivity.

Speaking on the occasion, **Mr. Gaurav Talwar**, Managing Director, Brilliant Polymers, said, *"We are delighted and deeply honored to receive two IFCA Star Awards this year. These recognitions reaffirm our relentless focus on innovation, performance, and customer satisfaction. Our solvent-based adhesive systems continue to set benchmarks for reliability and excellence in flexible packaging, while our solvent-free range advances our sustainability goals."*

Over the years, Brilliant Polymers has established itself as a trusted partner to the global packaging industry. With a production capacity of 60,000 MT per year at its state-of-the-art Ambarnath facility, the company serves customers across five continents and holds a 45% market share in India and 5% globally. Its solutions are known for delivering exceptional bonding, consistency, and process efficiency — helping customers achieve superior packaging performance while optimizing costs.

Brilliant Polymers' success at the IFCA Star Awards 2025 highlights not only its technological leadership but also its vision to drive progress in flexible packaging through innovation, sustainability, and customer collaboration.

About Brilliant Polymers:

Brilliant Polymers is one of India's leading manufacturers of laminating adhesives for flexible packaging, offering a full range of solvent-based and solvent-free solutions. Guided by its promise of *Technology, Quality, and Service*, the company continues to expand its global footprint and pioneer innovations that shape the future of packaging.
